Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on August 29, 2007 has been entered.

REASONS FOR ALLOWANCE

2. Claims 1, 3-9, 51-52, and 54-56 are allowed.

3. The following is an examiner's statement of reasons for allowance: The closest prior art, Sines et al. (U.S. 5,934,672), discloses a slot machine having a plurality of optical fibers (52) arranged with image input ends (53) adjacent to an image source-the symbol bearing outer surface of reel (51). The image input ends (53) form an image collector which is shaped or otherwise configured to gather an image from the reel. The optical fibers form an image conveyance which transfers the image or images gathered from the reel, and conveys them to a viewable presentation. This is done at optical fiber display ends (54). The display ends (54) of the optical fibers are positioned so as to form an image emitter or image emitting array which is either directly visible or passed through one or more lenses or screens (55) in order to focus or otherwise enhance the image viewed by the player. See Fig. 8 and Column 8, lines 24-53.

Conversely, claims 1, 8, and 51 of the instant invention is directed to a slot machine having a plurality of optical fibers having first ends optically coupled to said surface of said image display device and second ends for displaying simulated mechanical reels, at least some of the second ends define a radius of curvature that approximates the radius of curvature of a mechanical reel. Sines

fails to disclose, teach, or fairly suggest this feature. This claimed feature enables the instant invention to provide a slot machine having increased versatility while having simulated reels that are displayed aesthetically similar to traditional mechanical slot reels.

Oath/Declaration

4. The Examiner objected to the oath because the oath did not recite the language "material to patentability." The Examiner reviewed 37 CFR 1.56 and noticed that both statements (Examiner's statement and Applicant's statement) are actually recited, although in different contexts. The Examiner contacted his immediate supervisor, Bob Pezzuto, and discussed the matter. As a result, the Examiner withdraws the objection to the oath. The Examiner thanks Applicant's representative for bringing this issue to the Examiner's attention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott E. Jones whose telephone number is (571) 272-4438. The examiner can normally be reached on Monday - Friday, 8:30 A.M. - 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on (571) 272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
